MOHAMMED MAVIA SHARIFF

Entry-Level Software Developer | Full-Stack (React, Python, Node.js)

Mysuru, Karnataka, India | +91 7349754823 | maviashariffdev@gmail.com linkedin.com/in/mohammed-mavia-shariff-687a09407 | github.com/maviashariff | Portfolio

PROFESSIONAL SUMMARY

Entry-level full-stack developer and BCA graduate (2026) with hands-on experience building and deploying web applications using React, Node.js, Flask and SQLite. Completed a 4-month MERN stack internship at Frolicam and delivered 12+ web projects for clients, from gathering requirements to debugging and deployment. Comfortable troubleshooting issues and explaining technical solutions clearly.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML5, CSS3, SQL

Core Concepts : Data Structures And Algorithms (DSA), Object Oriented Programming (OOP)

Frameworks & Libraries: React.js, Node.js, Express.js, Flask, Tailwind CSS

Databases: MongoDB, SQLite, Firebase

Tools & Practices: Git, GitHub, REST APIs, JWT Authentication, Responsive Web Design, Deployment (Render, Netlify), AI-assisted development (Claude)

Problem-Solving: Debugging, Troubleshooting, Requirement Gathering, Client Communication

EXPERIENCE

MERN Stack Intern — Frolicam *Nov 2025 – Feb 2026*

Internship · Mysuru, Karnataka (Hybrid)

- Worked within a hybrid development team on MERN stack (MongoDB, Express.js, React.js, Node.js) tasks.
- Learned new frontend, backend and database concepts and applied them by building practice projects.
- Collaborated with team members and followed the team's workflow to complete assigned work.

Freelance Web Developer — Self-Employed *2024 – 2026*

Mysuru, Karnataka

- Delivered 12+ web applications for individual clients using Python/Flask, SQLite, Node.js and JavaScript.
- Gathered client requirements, built the application, deployed it on Render, and handled handover and troubleshooting.
- Designed and built a responsive website for a local appliance repair business in Mysuru, with service pages, customer reviews and click-to-call/WhatsApp booking (universalappliancesmysore.com).

PROJECTS

Rootstay — Rural Tourism Platform (Infosys Hackathon Prototype) *Live Demo | GitHub*

Tech: HTML5, Tailwind CSS, Firebase

- Built a prototype that lets rural homeowners and farmers list their properties as homestays and experience centers.
- Developed a multi-page interface covering property listings, host property upload and booking, with Firebase authentication.

Two Wheeler Management System — Freelance Project *Live Demo | GitHub*

Tech: Python, Flask, SQLite, Tailwind CSS, Gunicorn

- Built a role-based web app for service-center operations: admins register service requests, assign jobs to mechanics and monitor workload on a dashboard.
- Created a separate mechanic portal to view and update assigned jobs; deployed on Render.

AI/ML - Based Leaf deficiency Detector

Tech: Python, Flask, Tensorflow Lite,OpenCV,NumPy,Pillow

- Built an ML based web app to detect potential leaf nutrient deficiencies
- **Integrated** a TensorflowLite model with Flask for image -based predictions
- Implemented image preprocessing using openCv, Pillow ,and Numpy.
- Developed a web interface for image uploads and prediction results

EDUCATION

BCA (Computer Applications) — St. Philomena's College, Mysuru *Aug 2023 – May 2026*

CGPA: 8.8 / 10
